Latest Novelties—Introductions of 1893.

Admiral Gervais. In the style of Mme. Crozy. The individual flower is not quite so large, but shows considerable more yellow in its markings. 3 feet.

Chas. Henderson. One of the best introductions of the season. A remarkably strong bushy grower, flowers large, of a rich crimson with satiny surface, petals well rounded and of good substance, bright green foliage. 3½ feet.

Comtesse L'Estoile. Another grand yellow. The flowers are of very large size, of a bright canary yellow, evenly and regularly spotted throughout with bright cinnamon red spots, foliage bright green. 3½ feet.

Denil de St. Grevy. A grand acquisition. Flowers of good size, with well rounded heavy petals of the most intense rich orange scarlet, foliage bronzy purple. 4½ feet.

Explorateur Crampbel. Bright orange crimson with deep crimson markings; foliage green. 4 feet.

Egandale. Flowers of a deep red color, compact spike, bronzy purple foliage. 4 feet.

J. D. Cabos. Flowers large, orange shaded capucine; foliage rich deep purple. 4½ feet.

Marquise Arthur de L'Aigle. A most beautiful variety, scarlet, bordered with golden yellow; foliage green. 3½ feet.

Maurice Mussy. Rich atiny vermilion scarlet, of large size; foliage green. 4 feet.

Nardy Pere. Intense rich brilliant crimson scarlet, very dazzling; foliage dark green with purple veins and stems. 4 feet.

Prof. Gerard. Flowers rich crimson scarlet, in large heads thrown well above the foliage, which is broad and massive, and of a dark green with purple edges and stems. 4½ feet.

Paul Bruant. Flower of immense size, intense shade of orange scarlet with satiny surface; foliage dark green with purple edge. 4 feet.

Secretary Stewart. Bright garnet in large spikes; foliage green. 4 feet.

Stadtgartner Sennholz. Intense brilliant crimson scarlet; foliage bronzy purple. 4½ feet.

75 cents each; the set of 14 varieties, one of each, for 10.00.

General Collection.

SPECIAL TRADE OFFER

February 1, 1893.

OF Dwarf French Ever-blooming Cannas.

RECEIVED

SEP 10 1923

U. S. Department of Agriculture

A GROUP OF DWARF FRENCH CANNAS.

WE take pleasure in sending you the accompanying colored plate of four of our newest varieties of Dwarf French Cannas, which you may find acceptable for framing and hanging in your office.

The varieties illustrated are amongst the finest of recent introduction, and together with the others named in the following list, comprise the most complete and beautiful collection of this most desirable and beautiful plant now offered to the public.

Magnificent effects in bedding and grouping may be produced by the judicious arrangement of these plants, which range in height from three to six feet; the brilliant colors of the flowers which are freely and continuously produced all summer, combined with the tropical appearance of the foliage, the vigor and healthy growth of the plants, and their freedom from all insect pests, make them the most desirable of all plants for garden decoration. The dwarfer growing varieties are also admirable for growing in pots for winter blooming in doors.

THE FOUR GRAND VARIETIES SHOWN IN COLORED PLATE.

Alphonse Bouvier— This is, all points considered, probably the finest variety yet introduced. It is a remarkably luxuriant and free grower, in rich ground attaining a height of six to seven feet. In color it is a rich brilliant crimson, almost approaching scarlet when it first opens, changing to a deep dazzling crimson as the flower fully develops. Foliage rich deep green.

Price, 60 cts. each; \$6.00 per doz.; \$50.00 per 100. *Ready now.*

Captaine P. de Suzzoni— The finest yellow spotted variety yet introduced. Flowers very large, with broad rounded petals produced in large spikes; the ground color is of a rich canary yellow, while the entire flower is spotted with cinnamon red in such a manner as to intensify the yellow. Foliage light green, 5 to 5½ feet.

Price, 75 cts. each; \$7.50 per doz.; \$60.00 per 100. *Ready March 15.*

Paul Marquant— Another grand variety and one of the most pleasing and beautiful on account of its large size, and entirely distinct and novel color. The flowers stand out from the spike in such a manner as to attract special attention. Its color, difficult to describe, is of a bright salmon scarlet passing to a rosy carmine, with a peculiar silvery lustre which lights up the salmon very brightly; the foliage is of a dark green, and its habit very dwarf, growing from 3 to 3½ feet high.

Price, 75 cts. each; \$7.50 per doz.; \$60.00 per 100. *Ready March 15.*

Madame Crozy— This variety is already so well known that it seems unnecessary to offer any description of it. Many similar seedlings are continually offered as improvements, but among all we have seen or tried, it stands without an equal in its type. We were the first to offer this Canna in this country during the fall of 1890, and we know of no other plant of which such a large quantity was distributed, that gave such universal satisfaction. Our stock this season is very large, which enables us to offer it at a low price.

20 cts. each; \$2.00 per doz.; \$15.00 per 100. *Ready now.*

New Yellow Canna—Nellie Bowden.

A variety of American origin that comes very highly recommended. We give the introducer's description not having the opportunity of testing it on our own grounds. "Fine bright yellow flowers, having a touch of orange in the throat, borne in immense clusters and very free flowering; foliage rich green." 3 feet. 75 cts. each; \$8.00 per dozen.
